DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 4 is drawn to a medicinal composition comprising at least one of 12-HETE or 11,12-EET in a form of a cream, a gel, a gelatin capsule or a patch, classified in class 514, subclass 560.
- II. Claims 5-8 are drawn to a method of inhibiting differentiation of a fibroblast to an adipocyte with at least one of 12-HETE or 11, 12-EET, classified in class 514, subclass 560.
- III. Claim 9 is drawn to a composition comprising a medical product and an effective amount of 12-HETE, 11,12-EET, classified in class 514, subclasses 560 and 561.
- IV. Claims 10-13 are drawn to a method of inhibiting differentiation of a fibroblast to an adipocyte with an arachidonic oxidation cascade metabolite such as 12-(S)HETE, 12-(R)HETE, 11, 12-EET, classified in class 514, subclass 560.
- V. Claims 14-17 are drawn to a method of treating obesity in an animal or a human with 12-(S)HETE, 12-(R)HETE, 11, 12-EET or a mixture thereof, classified in class 514, subclasses 560 and 909.

Art Unit: 1614

- VI. Claim 18 is drawn to a method of inhibiting an average amount of triacylglycerides per fibroblast or per-adipocyte cell with 12-HETE, 11,12-EET, or mixture thereof, classified in class 514, subclass 560.

The six inventions are independent and distinct, each from the other as they have a separate status in the art as shown by their different and separate subject matter for inventive effort. Further, a reference, which anticipates any one of the above inventions, would neither anticipate nor make obvious of the other inventions. Each such invention is capable of supporting its own patent. For these reasons, the restriction requirement is proper.

To be complete, applicants' response must include a provisional election even though the requirement may be traverse.

The applicants are required to elect a single invention for examination purposes.
